P.B.V. SAI SUHANTH

Microsoft 365 & Power Platform Engineer

+44-7466266808 | Saisuhanth@outlook.com | United Kingdom | 10+ Years Experience

PROFESSIONAL SUMMARY

Microsoft 365 & Azure Engineer with hands-on experience managing and supporting enterprise cloud environments. I work across Azure Services, SharePoint Online, Exchange Online, OneDrive for Business, Microsoft Teams, and the Power Platform with a focus on Automation and making services run more smoothly. I enjoy digging into complex technical problems, building practical cloud solutions, and writing clear documentation that actually helps people. I also work closely with both business and technical teams to deliver outcomes that are secure, scalable, and genuinely useful to end users. I'm keen on emerging technologies and AI driven productivity tools, and I'm looking for ways to improve how services are delivered.

CORE COMPETENCIES & TECHNICAL SKILLS

Cloud & Infrastructure: Azure VM's administration, Azure Run book, Azure Logic Apps, Azure Storage accounts and Azure Monitor
M365 Administration: Exchange Online, SharePoint Online, Microsoft Teams, Power Platform, Microsoft Entra ID, Intune MDM
Email Security: SPF, DKIM, DMARC, BIMI, Proofpoint, Cisco IronPort, Message Labs, Exchange Online Protection, Microsoft Defender
Identity & Access: Active Directory, Microsoft Entra ID, RBAC, Multi-Factor Authentication, Conditional Access
Automation: PowerShell Scripting, Power Automate, Power Apps (Canvas), Copilot Studio, REST APIs
Power Platform: Power BI Admin, Power Apps, Power Automate, Centre of Excellence (COE) Toolkit, DLP Policies
Migration Tools: BitTitan MigrationWiz, Tenant-to-Tenant Migration, Mailbox Migration (On-Prem to M365)
Networking: DNS, DHCP, MX Records, SMTP Relay, Networking Fundamentals
Service Management: ITIL framework, ServiceNow (incident/change/request management)
Other Platforms: Zoho Suite, Google Workspace, Teams Rooms Pro Management

CERTIFICATIONS

- Proofpoint Certified Email Authentication Specialist
- Fortinet Certified Associate – Cybersecurity
- Microsoft Certified: Security, Compliance & Identity Fundamentals
- Microsoft Certified: Power Platform Fundamentals
- Microsoft Certified: Azure Fundamentals
- Microsoft 365 Certified: Copilot and Agent Administration Fundamentals

PROFESSIONAL EXPERIENCE

Assistant Consultant – M365 & Power Platform | Tata Consultancy Services (TCS) *Aug 2022 – Present*

- Currently managing one of the largest UK retailer's M365 environment through Tata Consultancy Services where administer and support core M365 services – Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams for over 100K users, keeping day to day operations stable and business critical services running smoothly.
- Led tenant to tenant Mailbox migration of 2000+ mailboxes after merging of company and migrated mailboxes to .pst for ingesting into Proofpoint archive services for backup purpose using Bit Titan tool.
- Gathering and Analysing business requirements through stakeholder meetings and workshops, translating user goals into M365 architecture and solutions, ensuring scalability, reliability, and enterprise grade security.
- Conducting regular infrastructure capacity reviews, monitoring M365 services usage and working with stakeholders to manage capacity growth in line with business demand.
- Manage SharePoint Online storage and maintain the environment in accordance with industry-standard governance and compliance policies.
- Troubleshooting SharePoint permission issues related to Guest access and ensuring that all permissions are following as per organization's compliance policy.
- Configuring and Managing Teams policies, event policies, scheduling reports via Teams Admin Centre (TAC).
- Configuring and Managing policies related to Microsoft Teams Room Devices and troubleshoot issues related to MTR Android Devices via Teams Rooms Pro Management portal.
- Managing Proofpoint SER relay user credentials creating new based on the ServiceNow Service Requests and renewing credentials on the request when expired.

- Conducting monthly capacity reviews of Proofpoint SER and ensuring that capacity used per application is falling inline with Technical Design document and sending email notification for the over utilized capacity application owners (Automated this process using Power Automate)
- Developed a Power Apps application for reporting issues in retail stores and meeting rooms, automatically creating ServiceNow incidents and improving incident management efficiency.
- Delivered a Power Apps solution to support an asset refresh programme, enabling users to schedule appointments with the refresh team based on available time slots through Power Apps and Power Automate.
- Developed a Power Automate solution to collect user feedback on Interaction tickets directly within Microsoft Teams when tickets are closed, automatically updating records without requiring users to open hyperlinks or switch applications.
- Created Power Automate workflows to distribute automated management information (MI) reports to senior executives three times daily.
- Developed a proof of concept (POC) that automated Microsoft 365 service requests, including SharePoint Online site creation and distribution list membership management, directly through Microsoft Copilot chat while maintaining an appropriate approval process.

Senior Consultant – M365 & Exchange | **Capgemini Technology Services** *May 2020 – Aug 2022*

- Led M365 messaging environment setups including MX, SPF, DKIM, DMARC, transport rules, and third-party email gateway integrations (Proofpoint, Message Labs).
- Created Retention policies, Retention tags, Send/Receive connectors, accepted domains, and RBAC configurations.
- Played a key role in shaping email security policies and procedures, putting them into practice through configuration of content filters, spam controls, transport rules, and domain restrictions — ensuring the environment stayed secure and compliant with regulatory standards.
- Monitor Power BI capacities, create new capacities, and assign workspaces to premium capacities.
- Administered SharePoint Online environment including site creation, security policies, sharing settings, and data governance compliance.
- Administer Power Platform: create Environments and DLP policies, implement and manage Centre of Excellence (COE) toolkit.
- Monitored server health, disk space, backup status, DAG health, and O365 licence utilisation proactively.
- Troubleshot email delivery issues, authentication failures, and performed message tracking and tracing.

Process Lead – IT Infrastructure & Messaging | **Broadridge Financial Solutions** *Apr 2016 – May 2020*

- Led process improvements and automation initiatives for IT infrastructure and messaging operations.
- Created new domains, DKIM signing profiles, signing keys, and managed SMTP relay access for bulk/marketing email delivery.
- Monitored and maintained Exchange Server environments and Active Directory services.
- Engaged with technology vendors including Cisco, Microsoft, and Symantec to resolve product issues, evaluate roadmaps, and assess suitability against business requirements.
- Acted as lead technical colleague, coordinating cross-functional teams and mentoring junior engineers on best practices, technical escalations, and knowledge transfer.

Technical Support Engineer | **Landmark Group** *Mar 2015 – Apr 2016*

- Provided Level1 technical support for Office 365, Active Directory, DNS, and DHCP environments.
- Worked on IBM Lotus Notes and IBM Domino Server.

Junior Broadcast Engineer | **Aamoda Broadcasting Company** *Jun 2013 – Nov 2014*

- Managed broadcast systems, network infrastructure, and technical operations for live broadcasting.

KEY ACHIEVEMENTS

- **Delivered large-scale Tenant-to-Tenant migration for a major UK retail organisation with zero data loss.**
- **Reduced phishing incidents by implementing end-to-end DMARC enforcement with BIMI across multiple client domains.**
- **Automated 10+ repetitive IT admin tasks using PowerShell & Power Automate, saving significant operational hours weekly.**
- **Successfully implemented Proofpoint email gateway infrastructure, improving email security posture for enterprise clients.**

EDUCATION

B.Tech in Electronics & Communication Engineering (ECE) *2013*

DJRIET, Affiliated to JNTU-K

Diploma in Electronics & Communication Engineering (ECE) *2010*

AANM & VVRSR Polytechnic
